

## Percent of Homes with Private Well Water by County, Maine 2014

### About this chart

This chart shows the estimated percent of homes that rely on a private well. These data are from the Maine Behavioral Risk Factor Surveillance System (BRFSS), a random-digit-dial telephone survey of non-institutionalized Maine adults ages 18 years and older. Survey participants were asked, "Do you get any of your water from a well?"

In order for these data to be representative of all homes in Maine, and to adjust for survey participant non-response, statistical weights were used to calculate the estimated percent.

### Source of these data

The Maine BRFSS provided these data. The table was prepared by the Maine Environmental Public Health Tracking Program. Data updated: 01/2017. Display updated: 01/2017.
